## PROFILE

An analytical Software Engineering Technology student, knowledgeable with Agile practices, troubleshooting applications and databases. Highly collaborative, with strong communication and problem-solving skills gained through applied projects.

## HIGHLIGHT OF SKILLS

- Skilled with HTML5, CSS3, JavaScript, jQuery, Java, and Window OS environment
- Knowledgeable of C#, MySQL, Oracle SQL, MongoDB, and Unix/Linux
- Foundational understanding of Python, Node.js, Express.js, and Spring Framework
- Uses various tools including MS Office, Jira, Tableau, Trello, GitHub, and MS Project
- Multilingual with fluency in Korean and English

---

## EDUCATION

### SOFTWARE ENGINEERING TECHNOLOGY (CO-OP) ADVANCED DIPLOMA

*Jan. 2022 - Present*

Centennial College, Toronto, ON

- GPA: 4.4 / 4.5

#### Related Courses:

Software Engineering Fundamentals  
Client-Side Web Development  
Software Requirements Engineering

Web Interface Design  
Java Programming  
Web App Development

Database Concepts  
Unix/Linux OS  
Software Systems Design

---

## PROJECTS

### WEB DESIGN - Academic Project

- **Purpose:** Create a responsive marketing website for a real estate agent using C#, HTML, CSS and JavaScript
- **Status:** Completed the project with an A+ grade

### Graphical Password System (SRS) - Academic Project

- **Purpose:** Collaborated in a group applying Agile methodology, to create software requirements specification document for a security app *Graphical Password System*, that allows users to prevent possible hacking in public places such as shoulder surfing.
- **Status:** Completed the project with an A+ grade

### BMI CALCULATOR (Web Application) - Academic Project

- **Purpose:** Created a calculator web application with JavaScript that allows users to calculate BMI
- **Status:** Complete the project with an A+ grade

### DANCHU - Personal Project

- **Purpose:** Create a student network to study languages they don't know and develop websites or applications
- **Current Status:** Developing a website for the community and researching to create a chat application

### ANABADA PROJECT - Personal Project

- **Purpose:** Create a school-only used site for students to exchange unused items cheaply with each other
- **Current Status:** making the design and function part of the homepage using Express.js.

## RELATED ACTIVITIES

---

### PEER TUTOR, Software Engineering Technology

*May. 2022 - Present*

- Assist peers with understanding course content, assignment and concepts reviewed in class
- Provide support in problem-solving and answering questions regarding assignment/courses
- Review materials in advance of each week, to be prepared for providing support after each course
- Develop clear communication, interpersonal skills and ability to explain information concisely

### SELF-STUDY

- Takes initiative to self-study software engineering languages and concepts through online learning platforms
- Gained knowledge through self-study on data structures, algorithms, game development, IoT and security
- Consistently seeks new information, as an aspiring professional with a passion for technology
